

Nervous System Intro Notes

Classifications:

Central Nervous System (CNS) – composed of the _____
and _____

***receives and sends information

Peripheral Nervous System (PNS) – all the nerves outside the
central nervous system

*** _____

Other ways to classify nervous system:

Sensory Division – nerves that carry information _____
from sensory receptors

Types of sensory receptors:

Motor Division – nerves that carry impulses from the CNS to

Motor Division Classifications:

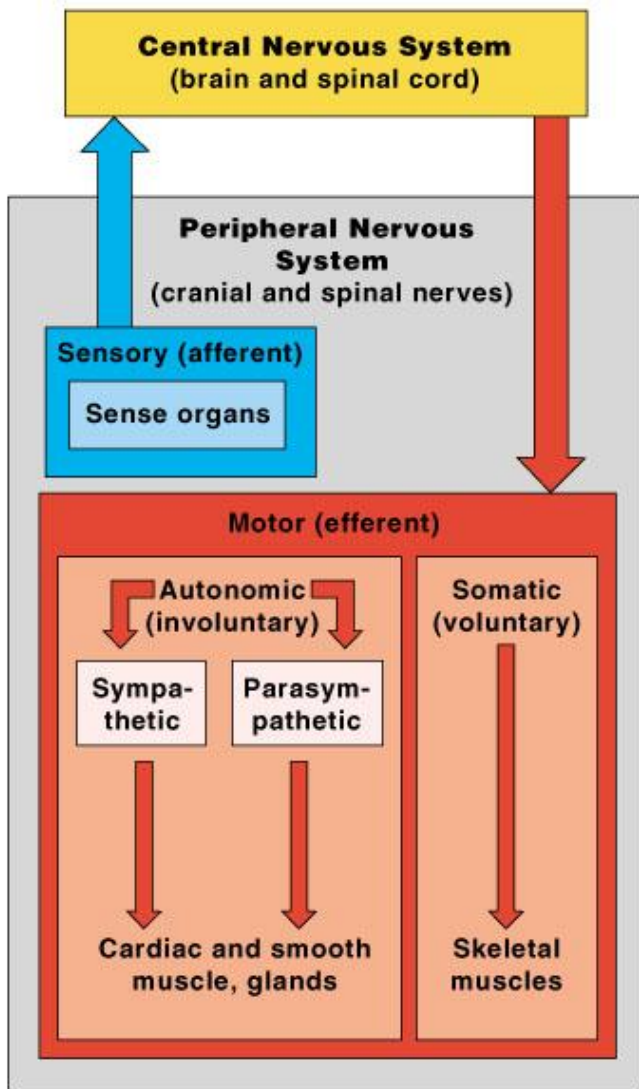

1. Somatic Nervous System - _____ control of skeletal muscles

2. Autonomic Nervous System - _____ control

Autonomic Nervous System Classifications:

a. Parasympathetic NS – “resting and digesting” system

b. Sympathetic NS – “fight or flight” system

Parasympathetic

Sympathetic
